

It's Bacteriostatic!
Bacteria cannot grow or survive in the filter media

Small enough to fit in your pocket, effective enough to reduce water contaminants for up to 6 months.

The World's water supply, according to National statistics from different publications and Government studies, shows all water is contaminated in some way. Therefore, for the consumer the only safe way to have clean water is by utilizing some form of water filtration.

Clean Sip™ is a revolutionary new "IONIC WATER PURIFICATION SYSTEM" you can carry with you anywhere. It's truly an amazing water purification system in a straw.

Clean Sip™ comes with its own unique carrying case to hold and protect the straw between uses.

Clean Sip™ is available in a variety of colored mouth pieces, such as red, yellow, blue, green, white, black, pink, orange, etc., making it identifiable and personal. Now every member of the family can have their own special water filter in a straw. It's perfect for people on the go. Carry **Clean Sip™** with you wherever you go and drink fresh, clean water anytime. It is just a Sip away!

Great for TRAVEL, CAMPERS, RESTAURANTS & OFFICE
CLEAN SIP™ is truly a PERSONAL, PORTABLE water filter in a straw!

WATER is Essential for LIFE

"Give Water a Try and Become Your Own Healer."

Dr. F. Batmanghelidj MD

"Understanding dehydration will empower you to become much healthier and you will be able to become your own healer."

"The human body is composed of 25 percent solid matter and 75 percent water. Brain tissue is 85 percent water. When we starve body cells of water, they start to complain - and may set up adverse reactions."

"Dry mouth is not the only sign of dehydration and waiting to get thirsty is wrong. Pain in the body is a crisis call of the body for water. Thirst should be prevented. When the body does not receive enough water and you have pain, that is a sign of dehydration."

"Once you understand how the human body works, the wonderful simplicity of water as a free and permanently available choice of medication for so many health problems begins to make sense."

Dr. F. Batmanghelidj MD

A gift that really keeps on giving!

Drink Fresh,
Clean Water...
Wherever You Go!

Clean Sip™

Mouthpiece
MicroFilter
Activated Charcoal
Micro Filter
Patented Media

Clean Sip™ uses the latest **STATE-OF-THE-ART** technology in water filtration. It uses a combination of three micro filters, activated charcoal and a patented, high purity metal alloy containing two dissimilar metals (containing positive and negative charges), that once wet, creates an '**ELECTROSTATIC CHARGE**' that attracts contaminants and 'electroplates' them onto the media through a process called "**Electro Chemical Oxidation Reduction**".

This combination of filters and technology is very effective and helps reduce contaminants in water. **Clean Sip™** is not intended for use with any other types of liquids. Do not use with sodas, juice, alcohol, coffee, tea, or flavored waters.

Clean Sip™ reduces such heavy metals as lead, mercury, hydrogen sulfide aluminum, arsenic, fluoride, cadmium and barium, in addition to chlorine, algae, fungus, scale, sediment, and E-Coli.

It's As Simple As A
Sip Through A Straw!
It's Long Lasting Too!

The **CLEAN SIP** straw
will treat approximately five 8 ounce
glasses of water a day for up to four to
six months depending on the condition
of the water.
